PATIENT INFORMATION FOR NERVE CONDUCTION STUDIES

Where to park ?

Free car parking is available at the front of the practice on Kensington Road
Please note clearway times or on nearby side streets

What preparation is required?

It is important not to apply any moisturiser or cream to the limbs being tested on the day of testing.

Please remove any jewelry on the wrists if the testing involves the upper limbs.

What does the test involve?

Nerve conduction studies assess the function of the nerves. The nerves are stimulated by small electrical stimuli (similar to that obtained by touching a battery) and the responses measured by electrodes placed over the muscles or on the skin. No needles will be used.

How long will it take?

Most studies are completed in less than 30 minutes.

What is the cost of the study?

There is **no cost** to you for the test. The study is bulk billed (ie Medicare covers the complete cost of the study), or it will be covered by Workcover/Motor Accident Commission if prior approval has been confirmed.
(please bring claim approval number/details to appointment)

When will the results be available?

The results are available immediately upon completion of the test.

Thank you for calling Southern Neurology & Neurophysiology
