Name _____

Address _____

Provider Number: _____

Signature: _____

Preferred method of receiving your results - via patient or fax to _____

PATIENT INFORMATION FOR NERVE STUDIES

Where to park?

Limited free car parking is available at the front of the practice on Kensington Road. Parking is also available on nearby side streets.

What preparation is required?

It is important not to apply any moisturiser or cream to the limbs being tested on the day of testing. Please remove any jewellery on the wrist if the testing involves the upper limbs.

What does the test involve?

Nerve conduction studies assess the function of the nerves. The nerves are stimulated by small electrical stimuli(similar to that obtained by touching a battery) and the the responses are measured by electrodes placed over the muscles or on the skin. No needles will be used.

How long will it take?

Most studies are completed in less than 30 minutes.

What is the cost of the study?

Unfortunately due to the rising cost of consumables for the Nerve Conduction Studies, an out of pocket fee of \$50 will now apply for all patients, except for pensioners and healthcare card holders. We ask that you pay the full fee of \$272.15 and the Medicare rebate will be \$222.15.

We accept Workcover/Motor Accident Commission if prior approval has been confirmed. (please bring claim approval number/ details to the appointment).

When will the results be available?

The results are available immediately upon the completion of the test.

Hours of Business

Monday to Friday 8.00 am - 5.30 pm

Phones Operational

Monday to Friday 8.30 am - 12 noon

Monday to Thursday 1.00 pm to 4.30 pm

Please note we are unavailable between 12.00 to 1.00 pm daily.
